SUMMARY

I do product marketing and go-to-market for technical B2B products, from positioning and battle cards through launch and pipeline. As Aiseberg's first US hire I ran 32 discovery sessions with 13 named design partners and helped land the first signed enterprise deal with Splunk, a Cisco company. Before that I built revenue reporting at POLITICO and sold enterprise infrastructure, and I want a product marketing role where launches are judged on pipeline.

EXPERIENCE

Product Marketing Manager & GTM | Aisepedia (Aiseberg Inc.) *Sept 2025 – Oct 2026 | San Francisco, CA*

- Conducted 32 discovery sessions with senior product marketing leaders and rewrote Aisepedia's positioning story from v1 to v2 in the buyers' own language, while their feature requests reached the product roadmap through 13 named design partners.
- Wrote Aisepedia's battle cards and objection-handling guides from competitive intelligence and buyer research, and the team carried them into 30+ enterprise sales conversations where the buyer was usually a product marketing Director or Vice President.
- Guided the Splunk agreement with the founder over roughly 7 to 8 months, mostly procurement redlines and Cisco's vendor onboarding, and helped land the first signed enterprise deal with Splunk, a Cisco company, converted from a design partner.
- Managed the plan for Aisepedia's 1 April 2026 US launch, splitting a five-figure budget between paid ads and influencer partners, then reported results by channel, with the LinkedIn campaign bringing in 42 beta sign-ups at about $17 per sign-up.
- Organized PMM 2.0, an invite-only industry gathering in San Francisco that drew 36 senior product marketing leaders, then scheduled each attendee's follow-up within a week by ICP fit and role, and about 5 to 8 attendees booked a product demo.
- Set up HubSpot lead statuses with custom stage categories and a daily dashboard over 134 tracked accounts, giving the founder a single running view of roughly $400K in qualified pipeline and of where every account stood in the sales process.

Senior Revenue Operations Analyst | POLITICO *Jun 2024 - Jul 2025 | Arlington, VA*

- Reconciled renewal, upsell, and new-business ACV by product line each week in POLITICO's wallet-retention report for the COO and VP Finance, compared with budget and last year's figures, and the gaps it exposed came to $2.6M in recoverable ACV.
- Coded about 30 to 40 recorded Gong sales calls by buyer priority and the competitors buyers named, producing personas that POLITICO's product strategy team used to define buyer types and then shared with the product development team.

Technology Sales Specialist | Quantum Corporation (incl. EnCloudEn) *Jul 2020 - Jul 2022 | Bengaluru, India*

- Investigated why Quantum sellers were missing renewals, traced it to a Salesforce notification defect hiding expired contracts and warranties, and reviewed 80+ accounts while the vendor ticket stayed open, flagging buy-backs that recovered $473K year over year.
- Translated enterprise IT buyers' requirements into technical specifications and formal proposals for EnCloudEn's infrastructure platform, and paired with the solution architect on live demos for buyers who judged every vendor on its architecture.

Lead, Business Strategy and Marketing | Peepal Consulting *Nov 2018 - Jul 2020 | Bengaluru, India*

- Finished 9 straight months 15% over Peepal's quarterly revenue target on a 56-client recruitment book, combining business development with email lead generation, and earned the firm's top performance award twice during that streak.
- Revived Peepal's dormant LinkedIn page with recruiter-focused posts and recruiting tips for a 76% reach gain, and supervised 2 interns on ticketing and venue support for the firm's gold sponsorship of the TA Leadership Forum Hyderabad 2019.

EDUCATION

STEM MBA - American University, Kogod School of Business *2022 - 2024 | (Washington DC, USA)*
Merit Scholarship recipient; Graduate Research Associate to the Chair, Department of Management.

BE, Mechatronics Engineering - Acharya Institute of Technology *2018 | (Bengaluru, India)*
